

Services

With over 7 years of web development experience in both customer facing and internal web integration projects let me assist you in taking your enterprise software to the next level. I specialize in the following areas.
Custom Web Development

Are you ready to take your small business to the next level by adding a presense on the web? Or do you have a website but it could use a facelift? I have many years experience developing customer facing web applications that make a difference to your bottom line.

Software Integration

Tired of using all those different programs? Or worse, tired of copying information from one program to the next. Why can't they just work together? They can, and I can help you make that happen. Streamlined processes that have been automated prevent human error, are quicker and allow you to focus on what matters most...running your business. Training

I have extensive experience in technology training. From one on one tutoring to full blown technology boot camps, let me put together a ciriculum that will acomplish your goals in the most efficient way possible.
